No. 1178.—The following rewards have been granted to the undermentioned Indian officers, non-commissioned officers and men for acts of gallantry and devotion to duty in the field :—

Awarded the Military Cross.

Subadar-Major Bhim Sing Thapa, I.O M., Gurkha Rifles.

For conspicuous gallantry and devotion to duty on the 12th November

1917. During an attack he led his platoon with great skill and gallantry through intense machine gun and rifle fire. After the capture of the position, seeing that a gap had occurred between the right of the battalion and the next unit, he, on his own initiative, filled up the gap and assuming command of that portion of the line (the British officer having been killed) consolidated his position under very heavy shell and machine gun fire.

Subadar Damar Sing Gurung, Gurkha Rifles.

For conspicuous gallantry and good leadership on the 19th January 1918, during the capture of an enemy patrol and the subsequent counter-attack by a force nearly twice as large as our own. The party with Subadar Damar Sing was the first to charge the patrol, and one of the enemy had already unhooked his bomb and was about to throw it when Subadar Damar Sing, who had outstripped the rest of his men, unhesitatingly sprang on him and tore the bomb from his hand. Subsequently, Subadar Damar Sing voluntarily took a message across one hundred yards of exposed ground under heavy fire to another portion of our line, of which he took command until the attack was finally repulsed.

Awarded the Indian Order of Merit, 1st Class.

Subadar Muhammad Arbi, I. O. M., Rifles.

This Indian officer occupied a post on a hill with a small detachment in action on the 19th November 1917. The party was heavily shelled and was attacked three times. The position was an important one, and it was due to the courage, skill and initiative of Subadar Muhammad Arbi that it was held.

Awarded the Indian Order of Merit, 2nd Class.

Subadar Balbir Thapa, Gurkha Rifles.

For conspicuous gallantry and leadership. During an attack on the 12th November 1917, throughout the advance over some fifteen hundred yards of open ground under continuous shell, rifle and machine gun fire, by his personal example he kept the advancing line steady and unfaltering. In the actual assault he inspired all about him by his keenness and dash, and was himself among the foremost in the enemy's position on the crest of the hill.

Subadar Randhoj Rana, Gurkha Rifles.

For conspicuous gallantry on the night of the 21st-22nd November 1917. He led and organised the remnants of his company with great skill, counter-attacking the enemy and inflicting heavy loss.

Jemadar Lal Bahadur Gurung, Gurkha Rifles.

For conspicuous bravery and gallantry on the 21st November, 1917. Though severely wounded he refused to leave his command. His initiative and coolness kept his men well in hand and they were able to beat off a determined attack.

Jemadar Harnath Singh, Rifles.

On the night of the 21st-22nd November 1917 this Indian officer very gallantly led his men during an attack and helped to capture a machine gun. He charged three separate lines of trenches and displayed much ability in withdrawing his men when ordered.

Jemadar Bhim Singh, Rifles.

On the night of the 21st-22nd November 1917 this Indian officer very gallantly led his platoon, cleared the enemy trenches and assisted in the capture of a machine gun. He behaved gallantly in holding on to the trenches during the whole of the 22nd November, under heavy shell and machine gun fire.

Subadar (Temporary Subadar-Major) Bhura Ram, Rifles.

On the 21st-22nd November 1917 this officer displayed great courage under shell fire until wounded on the 22nd. His example animated all ranks.

Subadar Lal Khan, Rifles.

This officer was associated with Subadar Muhammad Arbi in the action on the 19th November 1917, described above, and shared with him the success in seizing and retaining the position mentioned.

Jemadar Hans Ram, Rifles.

On the 22nd November 1917 this officer displayed great courage and determination in holding his trench under very severe bombardments and in leading his platoon in two successful counter-attacks.

Jemadar Arjun Ram, Rifles.

On the night of the 21st-22nd November 1917 he acted with great courage and initiative, and gallantly led his platoon into action; he also helped in the capture of a machine gun.

Jemadar Asbir Gurung, Gurkha Rifles.

For gallantry and devotion to duty on the 11th December 1917, when in command of a strong patrol sent to reconnoitre a village which he found strongly held. Subsequently, when our attack on the enemy position took place, he materially assisted our advance by his covering fire.

Awarded the Indian Distinguished Service Medal.

No. 1178.—The following rewards have been granted to the undermentioned Indian officers, non-commissioned officers and men for acts of gallantry and devotion to duty in the field :—

Awarded the Military Cross.

Subadar-Major Bhim Sing Thapa, I.O.M., Gurkha Rifles.

For conspicuous gallantry and devotion to duty on the 12th November

1917. During an attack he led his platoon with great skill and gallantry through intense machine gun and rifle fire. After the capture of the position, seeing that a gap had occurred between the right of the battalion and the next unit, he, on his own initiative, filled up the gap and assuming command of that portion of the line (the British officer having been killed) consolidated his position under very heavy shell and machine gun fire.

Subadar Damar Sing Gurung, Gurkha Rifles.

For conspicuous gallantry and good leadership on the 19th January 1918, during the capture of an enemy patrol and the subsequent counter-attack by a force nearly twice as large as our own. The party with Subadar Damar Sing was the first to charge the patrol, and one of the enemy had already unhooked his bomb and was about to throw it when Subadar Damar Sing, who had outstripped the rest of his men, unhesitatingly sprang on him and tore the bomb from his hand. Subsequently, Subadar Damar Sing voluntarily took a message across one hundred yards of exposed ground under heavy fire to another portion of our line, of which he took command until the attack was finally repulsed.

Awarded the Indian Order of Merit, 1st Class.

Subadar Muhammad Arbi, I. O. M., Rifles.

This Indian officer occupied a post on a hill with a small detachment in action on the 19th November 1917. The party was heavily shelled and was attacked three times. The position was an important one, and it was due to the courage, skill and initiative of Subadar Muhammad Arbi that it was held.

Awarded the Indian Order of Merit, 2nd Class.

Subadar Balbir Thapa, Gurkha Rifles.

For conspicuous gallantry and leadership. During an attack on the 12th November 1917, throughout the advance over some fifteen hundred yards of open ground under continuous shell, rifle and machine gun fire, by his personal example he kept the advancing line steady and unfaltering. In the actual assault he inspired all about him by his keenness and dash, and was himself among the foremost in the enemy's position on the crest of the hill.

Subadar Randhoj Rana, Gurkha Rifles.

For conspicuous gallantry on the night of the 21st-22nd November 1917. He led and organised the remnants of his company with great skill, counter-attacking the enemy and inflicting heavy loss.

Jemadar Lal Bahadur Gurung, Gurkha Rifles.

The deaths recorded in the above statement are 1,171 fewer than in the previous week. The increased mortality reported from the Punjab is probably accounted for by delayed or inaccurate reporting of deaths in Patiala where 1,357 deaths were recorded in the week under report against 131 in the last statement. Such a rise in plague mortality in the third week of May is highly improbable.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 1st June, 1918.

Burma.—The rainfall during the week was general throughout the Province. The fall was heavy in the Aracan and Tenasserim coasts and good elsewhere. Ploughing for the main rice crops in Lower Burma is general. In Upper Burma ploughing for the cultivation of upland crops has commenced. Sowings of sesamum, cotton and groundnuts are proceeding. Standing crops are in good condition. Cattle are healthy. The price of unhusked rice at Rangoon has risen further but is still below normal. The market for white rice is steady at Rs. 225 for specials.

Assam.—The weather is seasonable and favourable. Manufacture of tea, sowing of winter rice and cotton and ploughing for rice seedlings continue. Sowing of autumn rice and jute and planting of sugarcane have been practically completed. Prospects of crops are fair to good. Cattle disease is reported from six districts. The price of common rice is practically unchanged.

Bengal.—During the week moderate to heavy rain fell all over the Province. Ploughing of fields for winter rice and sowing of seeds in nurseries are progressing briskly. Weeding of jute and autumn paddy continues. Prospects are good. The average price of common rice has risen by 0·7 per cent.

Bihar and Orissa.—The rainfall during the week was general over the Province, the fall being light to moderate. Preparation of lands for and sowing of autumn crops are in progress. Standing crops are doing well. The price of common rice has risen in six districts, fallen in two and remained stationary in the remaining districts as compared with that of the preceding week. Cattle disease is reported from fourteen districts. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—The week was rainless except for light showers in a few districts. Threshing and winnowing of spring crops and weighing of opium have been completed. Irrigation of sugarcane and extra crops, sowing and hoeing of sugarcane and preparation of land for autumn crops continue. Sowing of autumn crops, indigo, cotton and paddy and harvesting and threshing of extra crops have begun in places. Standing crops are doing well. Prospects are generally favourable. Agricultural stock is in good condition though cattle disease is still reported from a few districts. Fodder, water and market supplies are sufficient. Prices are generally stationary.

The weekly report on scarcity in Garhwal is as follows:—No rain fell during the week. Standing crops are in good condition. Weeding of early rice has commenced. Sowing of *mandua* continues. Prospects are good. Agricultural stock is generally in good condition. Cattle disease prevails in some *patties*. Fodder and water are sufficient. Prices are almost stationary. Market rates at Pauri, wheat 6 and barley 8 seers per rupee and at Chamoli wheat 3 and barley 5 seers per rupee. In the Chamoli sub-division prices are very variable. Advances continue for the importation of grain, subsistence takavi and grain tickets. Importation of grain continues. Conditions in the north have somewhat improved by the ripening of spring crops. Gratuitous relief was given to 274 persons. The public health is generally good.

Punjab.—Light showers fell in some southeastern and central districts and proved useful for standing extra spring crops and for autumn sowings. Threshing of wheat continues in some districts. The yield is generally good on irrigated and below normal to normal on unirrigated areas. Sowings of cotton and other autumn crops continue and are normal. Standing extra spring and autumn crops are average to good. Cattle are generally healthy and fodder and water are sufficient. Prices are generally stationary but have a slight upward tendency. They range generally between normal and warning rates. Price of wheat:—Rawalpindi 8½, Ferozepore 10, Ambala and Lyallpur 9½ and Lahore 9 seers per rupee.

Jammu.—Prices are stationary. Slight local rain was received during the week. Harvesting has been nearly finished.

Kashmir.—The week was generally dry and hot in Anantnag and Muzaffarabad and wet in Baramula. Spring crops are in fair condition in the valley and are being harvested in Muzaffarabad with outturn normal. Cattle are generally healthy. Prices are normal in Muzaffarabad and Anantnag and are rising slightly in Baramula.

Rajputana.—The weather during the week was hot and cloudy. Harvesting of spring crops has been almost completed. Land is being prepared for the sowing of autumn crops. Cattle are in fair condition. Fodder and water are sufficient. Prices are steady.

REPORT OF THE PATENT OFFICE.

The following report on the working of the Patent Office during the calendar year 1917, is published for general information :—

No. 1672-P., dated Calcutta, the 25th April 1918.

From—H. G. GRAVES, ESQ., Controller of Patents and Designs,

To—The Secretary to the Government of India, DEPARTMENT OF COMMERCE AND INDUSTRY.

I have the honour to submit, for the information of the Government of India, the Annual Report of the Patent Office during the calendar year 1917.

2. The office, at 1, Council House Street, Calcutta, has been in my charge during this year. Although this office is a small one, it has done its best in men and money to help in the war. Mr. M. H. A. Morley, Superintendent, has joined the Indian Army Reserve of Officers and is in Mesopotamia. Mr. R. Peters, who took his place, is in the Calcutta Port Defence Corps, Indian Defence Force, and went to Poona for three months' training. Others on the staff are not fit for service and their sons at present are too young to join. But they have invested one-tenth of their combined salaries in the last war loan.

3. Six hundred and two applications for patents and 1,591 applications to register designs were made in 1917 as compared with 442 and 1,773 respectively in 1916. Figures for previous years will be found in the appended tables. The income of the office increased from R77,608-13 in 1916 to R90,846-7 in 1917, and is larger than ever it has been. This is mainly due to the increasing number of patents in force on which renewal fees are paid. In the year 1913 before the war, the number of applications for patents was 705. It fell successively to 588, 445, and 442 so that the present year's figure 602, shows a satisfactory revival. The increase has been fairly evenly spread in all subjects and it is not easy to particularise the trend of invention or to allocate a share to the effect of the war on any special industry. As indicated in my last report inventors in this country are not in sufficiently close contact with the problems of war to enable them to make many useful suggestions that could be patented. On the other hand, the increased activity in many trades and manufactures has led to a wider employment of the processes, methods and machinery which are used elsewhere in the world and are available in the common stock of knowledge.

4. Altogether, 2,516 patents were in force on 31st December 1917. These include 1,849 patents out of 2,496 sealed on 3,460 applications under the Indian Patents and Designs Act, 1911, together with 57 of the 148 patents converted under section 81 of that Act. The balance, 640, consists of exclusive privileges remaining under the Inventions and Designs Act, 1888. Renewal fees, with or without additional fees for late payment, were paid on 1,148 cases during the year and the cessation of 499 exclusive privileges and patents were notified. Last year, fees were only paid on 987, while 719 were allowed to cease. The following table shows the effect of the renewal fees on the life of the patents before 1914. After that year the number increases as 18 months or more are allowed for sealing :—

5. No application for the extension of the patent term was received during the year, and the only existing privilege, on which an extension had been granted, will cease early in 1918. Fifty-nine applications for extension of the term of copyright for five years in designs were allowed. Thirteen patents, which had been allowed to lapse, were restored under the provisions made for that purpose. Five applications to amend specifications were made ; three were allowed with or without modification, and two are pending. Entries of assignments, licenses, etc., were made in the Register of Patents in 28 cases. Five oppositions were entered to the grant of

patents and two of the four cases in the previous year were also under consideration. Two were decided in favour of the applicants, while the opponents succeeded in one case; one was not pursued and three are left for decision next year.

6. One appeal was made from the decision of the Controller to the Governor General in Council and disallowed. Altogether there have been eight appeals in which the Controller's decision was supported five times, reversed once and varied twice. The latter cases led to a modification of the Rules.

7. Specifications as soon as they are printed are distributed to 25 centres scattered throughout India (see appended list). Sets are also sent to the Patent Offices, London and Washington. They may be consulted together with the other publications of this office, free of charge, and copies are on sale at a uniform price of eight annas each. Nearly 3,000 specifications of inventions are in this way available and the number increases year by year. Copies of the specifications received from the United Kingdom Patent Office are also open to public inspection at the Patent Office, 1, Council House Street, Calcutta, the Record Office, Bombay, and the Connemara Library, Madras.

8. The practice of previous years in respect of enemy patents and other matters under the Indian Patents and Designs (Temporary Rules) Act and Indian Patents and Designs (Temporary) Rules, 1915, has been continued without alteration, except that extensions of time for the payment of fees and remissions of penalties have had to be granted more freely in view of postal delays. Also a number of applications have been held in suspense so as to avoid the publication of inventions which might be of advantage to the enemy. Of the eight licenses existing at the beginning of the year, for utilising patents owned by Germans, two have been cancelled at the request of the licensee and one patent on which a license was granted has ceased. No applications for avoidance or suspension of enemy-owned patents were made during the year. Royalties amounting to R1,727-12-1 has been paid to Government by the Licensees during the year and the total amount in hand on this account is R2,758-5-8.

9. The Patent Office Handbook (price one rupee), containing the Acts and Rules and also Instructions for the guidance of persons interested in inventions and designs, which was issued in 1916, has found an increasing sale, now that it is becoming better known. Sales of this and other publications, including the consolidated and annual indexes and printed specifications amounted to about R800.

10. The work of the office has progressed satisfactorily and has been kept up to date during the year The weekly notifications in the "Gazette of India" and the annual and quarterly numbers of the "Patent Office Journal" have been issued as in previous years.

11. The usual tables are appended.

DEPARTMENT OF STATISTICS, INDIA

CALCUTTA, MAY 30, 1918.

Third Forecast on the WHEAT CROP of 1917-18.

In the fourth year of war India's wheat crop is record both as regards the area under the crop and s yield. This is important because, with the ception of Russia, India is the second largest roducer and the fourth largest exporter of wheat.

The forecast is based on reports received from cal authorities and refers to 98·5 per cent of the tal wheat acreage of India. The returns, erefore, cover practically all the important heat-growing areas of India. The final memo-ndum on the wheat crop will be issued in the cond week of August.

The total area is estimated at 35,342,000 acres as mpared with 33,040,000 acres, reported at this me last year, or an increase of 7 per cent. The tal yield is estimated at 10,184,000 tons, as against),160,000 tons estimated at this time last year. will be seen that although there was an increase the area, there was not, owing to deficient winter ins, anything like a similar increase in outturn.

General condition of the crop.—Although the ilure of the winter rains affected the unirrigated* op, the yield is good in northern and western India, particularly in the Punjab. In central and eastern India, however, the crop appears to have suffered more severely from drought, and its condition is not good.

The crop in the Punjab is estimated to be exceptionally good. Had there been timely rain in December and January, it would have been still better, but it was helped by the rain in March. The later rains appear to have left the crop unimpaired, although they retarded harvesting operations. In the United Provinces, the outturn is a little inferior to that of last year. In Bombay, prospects are good. The Central Provinces crop is reported to have failed in some places owing to lack of winter rains and to high winds. Prospects in Central India are distinctly unpromising. Some of the Central India States have prohibited export to ease the local situation, and it is said that the absence of rice is forcing more people than usual to eat wheat.

As compared with the figures reported at the corresponding date of last year, the present estimate of yield shows an increase of 26 per cent in the North-West Frontier Province, 24 per cent in the

*The unirrigated wheat area is on the average of the five years ending 1915-16, about 49 per cent of the total wheat area in the Punjab, 51 per cent the United Provinces, and 73 per cent in the North-West Frontier Province.

Punjab, 9 per cent in Bombay, 6 per cent in Rajputana, and 4 per cent in Sind. On the other hand, the Central Provinces and Berar show a decrease of 31 per cent, the Central India States 18 per cent, Bengal and Bihar and Orissa 17 per cent each, and the United Provinces 7 per cent.

The provincial reports are summarised below :—

Punjab (33·3 per cent of the total area under wheat in India).—The total area is estimated at 11,288,000 acres (1,346,000 acres being in the Native States), which is 4 per cent above the area reported at this time last year. The total yield is estimated at 3,674,000 tons (426,000 tons being in the Native States) which is 24 per cent above last year's corresponding estimate. In the first half of April, rain accompanied by hail and high winds did some damage, which, however, was not considerable except in some low-lying lands and in parts of the Multan division. On the other hand, this rain was distinctly beneficial in the north-western districts, where the crop ripens much later than in the rest of the province. The weather during the latter half of April, and the first part of May was generally dry and clear, and was eminently favourable for harvesting operations. The water supply in canals was much better than last year, especially in the newly developing Bari Doab Colony. The yield is good on irrigated areas. The unirrigated crop is below normal on light lands, but elsewhere it is equal to or above normal. In the south-east of the province the unirrigated crop is particularly good. Harvesting is now practically complete, except in the north-west of the province. The quality of the grain is good, and the proportion of shrivelled and discoloured grain is below average, and in this respect the crop is certainly better than that of last year.

United Provinces (22·8 per cent of the total area under wheat in India).—The total area is estimated at 7,221,000 acres, which is 6 per cent more than the estimate made at this time last year. The total yield is estimated at 2,882,000 tons as against 3,086,000 tons reported at this time last year, or a decrease of 7 per cent, which is mainly attributable to the indifferent yield on unirrigated lands in Bundelkhand and Rohilkhand. Except in the hill tracts, where light showers were received, the month of April was practically rainless. Weather conditions were favourable for threshing and winnowing, and these operations are now approaching completion. The yield of the crop on irrigated lands is generally good, but the unirrigated wheat is not equal to that of last year.

Central Provinces and Berar (11·6 per cent of the total area under wheat in India).—The total area is now estimated at 4,027,000 acres (398,000 acres being in Berar and 132,000 acres in the Native States of Khairagarh and Nandgaon), which is 1 per cent above the corresponding estimate of last year. The total yield is estimated at 807,000 tons (74,000 tons being in Berar and 32,000 tons in the Native States), which is 31 per cent below the estimate made at this time last year. As stated in the special forecast, issued in April, the climatic conditions up to the end of March were not favourable to the wheat crop. Since then the weather has been clear and hot. Harvesting has been completed throughout the provinces, and threshing and winnowing operations are approaching completion.

Bombay (6·1 per cent of the total area under wheat in India).—The total area is estimated at 2,575,000 acres (655,000 acres being in the Native States), which is 18 per cent higher than the corresponding estimate of last year. The total yield is estimated at 649,000 tons (197,000 tons being in the Native States), which is 9 per cent above the estimate reported at this time last year. Except for the appearance of rust in a few places in the north Deccan, the weather conditions since sowing were favourable, and the crop progressed satisfactorily.

Sind (1·7 per cent of the total area under wheat in India).—The total area is estimated at 671,000 acres (23,000 acres in the Khairpur State), which is 12 per cent above the estimate made at this time last year. The total yield is estimated at 180,000 tons (6,000 tons in the Native State), which is 4 per cent above the corresponding estimate of last year. The crop required rain in the middle of the season, but this being absent the condition of the crop was only fair. The rain in March and April was too late for the early crop and induced rust on the late crop under the Jamrao Canal. The rise of the river in April damaged the crop slightly in parts of Nawabshah and in places in Sukkur.

(a) Including Native States.

Bihar and Orissa (4·2 per cent of the total area under wheat in India).—The area is estimated at 1,195,000 acres, which is 9 per cent below the corresponding estimate of last year. The yield is estimated at 495,000 tons, which is 17 per cent lower than the estimate made at this time last year. The weather conditions were generally favourable in the beginning of the season, but owing to the absence of winter rains the crop suffered to some extent in most districts of Bihar. According to the estimates of the District Officers the outturn of the crop for the province works out to 75 per cent of the normal, but the provincial Director of Agriculture remarks that the outturn appears to have been unduly underestimated in some districts, especially in Bihar, and that the outturn will be about 95 per cent of the normal, and on this basis the yield stated above has been estimated.

North-West Frontier Province (3·3 per cent of the total area under wheat in India).—The area is estimated at 1,175,000 acres, as against 1,054,000 acres estimated at this time last year, or an increase of 11 per cent. The yield is estimated at 302,000 tons, which is 26 per cent above the estimate made at this time last year. The season was generally favourable, and the yield is, on the whole, about normal.

Bengal (0·4 per cent of the total area under wheat in India).—The area is estimated at 124,000 acres, which is 4 per cent below the area reported at this time last year. The yield is estimated at 33,000 tons, which is 17 per cent lower than the corresponding estimate of last year. The season was, on the whole, unsatisfactory.

Delhi (0·1 per cent of the total area under wheat in India).—As estimated in the special forecast in April, the figures are 42,000 acres and 12,000 tons, as against 36,000 acres and 12,000 tons last year.

Ajmer-Merwara (0·04 per cent of the total area under wheat in India).—The area and yield are estimated at 22,000 acres and 10,000 tons, as against 28,000 acres and 10,000 tons estimated at this time last year.

Central India (9·4 per cent of the total area under wheat in India).—The total area sown is estimated at 4,313,000 acres, which is 20 per cent larger than the estimate made at this time last year. The total yield is estimated at 733,000 tons, which is 18 per cent less than the corresponding estimate of last year. Detailed figures *are as follows :—

Wheat in foreign countries.—From the latest information published by the International Institute of Agriculture, Rome, it appears that the area sown in the Argentine is estimated at 17,868,000 acres in 1917-18 as compared with 16,082,000 acres in 1916-17. The estimates for this year's crop in Australia are 9,853,000 acres and 3,277,000 tons, as against 11,525,000 acres and 4,065,000 tons in 1916-17. The area sown with winter wheat in the United States of America in 1917-18 is estimated at 42,152,000 acres, as against 40,073,000 acres in the previous year. In France the area under winter wheat is estimated at 11,355,000 acres, as compared with 10,564,000 acres in 1916-17. The area under winter wheat in Canada is estimated at 711,000 acres, as against 737,000 acres in 1916-17.

From unofficial sources, it appears that the condition of the winter crop in the United Kingdom and France is very much better than it was a year ago. In the Argentine the crop this year has turned out better than was expected ; there is a large exportable surplus, and supplies are steadily accumulating at railways and ports ready for shipment overseas. In the United States of America it is reported that "winter-kill" has been quite small, and the condition of the crop, even in the south-west, which suffered much from the autumn drought, is astonishingly good. In Italy the wheat crop continues to be promising.

PART I.

ESTABLISHMENT OF AIR FORCE.

(3) Subject to the provisions of any such order, the Air Council hereinafter constituted may make general or special regulations with respect to any matter with respect to which His Majesty may make orders under this section :

Provided that the administration of pensions, other than service pensions within the meaning of the Ministry of Pensions Act, 1916, shall vest in the Minister of Pensions.

During the month of May approximately 37,000 deaths from plague were reported in India, 20,330 of which occurred in the Punjab, the United Provinces come next with 5,087, then Rajputana 4,086, Bombay 2,142, Kashmir (Jammu) 1,372 and Bihar and Orissa 1,206. In no other administration did the monthly plague mortality run into four figures.

The total Indian plague death roll for May 1918 is relatively not excessive: it has been exceeded eight times during the past eighteen years. By far the greatest plague mortality ever experienced in the month of May was recorded in 1907 when 295,000 plague deaths were registered.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th June 1918, based on the Indian Daily Weather Reports of the period.

1. The Arabian Sea monsoon current was weak and very little rain fell in the Peninsula, the central parts of the country and northwest India. The Bay monsoon on the contrary was vigorous throughout the week; it gave abundant rain in Burma and northeast India and also carried rainfall into the United Provinces. A western disturbance combined with the monsoon occasioned some rain in Kashmir, the North-West Frontier Province, and the hills and submontane districts of the Punjab.

2. *Burma.*—Rainfall was nearly general in Lower Burma every day except the 7th.

Northeast India, including Orissa.—Nearly general rain fell in Assam on the 6th and 12th, in Bengal throughout the week, and in Bihar and Orissa every day except the 7th.

Season and Crop Prospects for the week ending Saturday, 8th June 1918.

Burma.—The rainfall during the week was general throughout the Province. It was heavy on the Arakan coast and moderate elsewhere. Ploughing for winter rice is becoming general in Lower Burma and in irrigated tracts of Upper Burma. Sowing of sesamum, cotton and groundnut continues. Harvesting of spring crops has been completed. Standing crops are in good condition. Cattle are generally healthy. The price of unhusked rice has fallen slightly and is below normal. The market for white rice is dull at Rs. 225 for specials.

Assam.—The weather during the week was rainy. Sowing of cotton has been nearly finished. Ploughing for winter rice seedlings and manufacture of tea continue. Prospects of crops are generally fair to good. Cattle disease is reported from seven districts. The price of common rice has risen.

Bengal.—Heavy rain fell over the greater part of eastern Bengal. Elsewhere the fall was moderate. Excessive rains caused damage to standing crops and retarded agricultural operations in places. Weeding of jute and paddy is nearing completion in western Bengal. Ploughing of fields for winter rice and sowing for seedlings continue. The average price of common rice has risen by 1·7 per cent.

Bihar and Orissa.—The rainfall during the week was general over the Province. The fall was mostly moderate. Sowing of winter paddy and of autumn crops continues. Standing crops are doing well. The price of common rice compared with that of the preceding week has risen in two districts, fallen in four and remained stationary in the remainder. Cattle disease is reported from seven districts. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—During the week good and general rail fell in almost all districts Irrigation of extra crops and sugarcane, sowing and hoeing of sugarcane and preparation of land for autumn crops continue. Sowing of autumn crops, indigo, cotton and paddy and harvesting and threshing of extra crops have begun generally. Standing crops are doing well. Prospects are favourable. Agricultural stock is in good condition and little cattle disease is reported. Fodder, water and market supplies are adequate. Prices are almost stationary.

The weekly report on scarcity in Garhwal is as follows:—The rainfall was 186 cents in Pauri and 97 cents in Karnprayag. Standing crops are doing well. Germination of *mandua* and transplantation of rice in irrigated land have commenced. Prospects are good. Cattle disease is prevalent in some *pattis*. Fodder and water are sufficient. Prices are falling slightly. Prices at Pauri, wheat 6 and barley 8 seers per rupee and at Chamoli, wheat 4 and barley 6 seers per rupee. In the Chamoli sub-division prices vary. Importation of grain continues and advances are being made for this purpose. Gratuitous relief was given to 47 persons but all reports have not been received. The public health is good.

Punjab.—Light or moderate rain fell in all the reporting districts except in a few western ones and proved useful for extra spring crops and for the sowing of autumn crops. Threshing of wheat has been almost finished. The yield is generally good on irrigated and below normal to normal on unirrigated areas. Sowings of cotton and of other autumn crops continue and are normal. Standing extra spring and autumn crops are average to good. The yield of the former is expected to be average. Cattle are healthy and fodder and water are sufficient. Prices are generally stationary and range between normal and warning rates except in some western districts where they are between warning and scarcity rates. Price of wheat:—Rawalpindi 7½, Ferozepore 10½, Lahore 9 and Ambala and Lyallpur 9½ seers per rupee.

North-West Frontier Province.—Slight rain fell in one district. More rain is badly needed throughout the Province. Sowing of autumn crops is proceeding normally. Threshing of spring crops and harvesting of certain extra spring crops are in progress in places with outturn average. Wheat is selling in Peshawar at 9 7/16 and in Dera Ismail Khan at 11 seers per rupee.

Jammu.—Prices are rising slightly. Harvesting has been finished.

Kashmir.—The week was generally cloudy but it was dry in the valley and wet in Muzaffarabad. Standing crops are in fair condition. Harvest is being reaped in Muzaffarabad where autumn sowings are in progress. Cattle are generally healthy. Prices are normal.

Rajputana.—The weather during the week was hot. Slight rain was received. Land is being prepared for autumn crops. Cattle are in fair condition. Fodder and water are sufficient. Prices are rising.

Central India.—During the week showers were received except in Bhopal and Bundelkhand. Threshing and winnowing of spring crops continue in Bhopal. Land is being prepared for autumn crops. Agricultural stock is generally in good condition. Scarcity of fodder and water is reported in certain places in Gwalior. Prices are high.

Central Provinces.—The weather during the week was hot and occasionally cloudy. Chhattisgarh tract received light to moderate rain, ranging between 25 cents in Bilaspur to 2 inches in Drug. Preparation of land for the next autumn crops is well advanced and sowing started in parts of Betul, Chhindwara, Bhandara, Chhattisgarh and Berar districts. The supply of fodder is in adequate inparts of Saugor, Narsinghpur, Betul, Chhindwara, Nagpur, Drug and Yeotmal. The condition of cattle is satisfactory except in Hoshangabad where want of fodder is felt. Prices remained stationary or fluctuated slightly, exhibiting an upward tendency.

Feudatory States.—Light to moderate rain fell in the States. Sowing of paddy has been started in eight States.

Bombay.—Slight rain fell during the week in the Presidency Proper. Except in two districts of Gujrat lands are being prepared for autumn crops. Sowing has commenced generally except in Gujrat. Cotton picking has been nearly completed in Gujrat, Baroda, Cutch and Rewa Kantha. Agricultural stock is sufficient. Prices of food grains are generally steady.

Hyderabad.—The rainfall during the week was general. The average fall was 1 inch 1 cent. Harvesting of late rice is almost over. Sowings for autumn crops have commenced in parts. Cattle are healthy. Prices of grains continue to be abnormally high. *Juar* sells at 3¾ seers per rupee in Bidar and Parbhani.

MEMORANDUM REGARDING THE PROBABLE AMOUNT OF MONSOON RAINFALL IN 1918.

Monsoon rainfall in India is affected by previous conditions over various parts of the earth. The recent data which appear to be of importance are :—

South America.

2. *Argentine Republic.*—Pressure was in defect by ·8 mm. in March, by 1·4 mm. in April and by ·7 mm. in May.

Chili.—Pressure data have not arrived.

The Indian Ocean.

3 (*a*) *Mauritius.*—Pressure conditions in May were less stable than usual, but on the whole pressure was in defect by ·01″.

(*b*) *Zanzibar.*—Rainfall in April amounted to 11·55″, the normal being 13·66″: in May it was 10·39″, against a normal of 9·97″. Winds in May were more westerly than usual, but of normal strength.

(*c*) *Seychelles.*—The May rainfall was 3·19″ or 46 per cent. in defect. Winds were stronger and somewhat more easterly than usual.

(*d*) *Logs of vessels.*—The available information is unusually limited and relates to the first three weeks of May. During this period the southeast trades along the east coast of Africa were much lighter than usual and variable winds prevailed over the central parts of the Arabian Sea.

The monsoon current which appeared in the southeast Arabian Sea in the second week would thus seem to have been recruited mainly from the trades in the neighbourhood of Seychelles, and it was probably owing to this that the rains failed to extend further north than the Peninsula.

Northeast Africa.

4 The rainfall of Abyssinia in April and May is brought by monsoon winds from the Indian Ocean, and can be estimated from the amount of water in the Blue Nile. This was still very much higher than usual on the 2nd June. Pressure in Egypt is roughly normal.

East Africa.

5. In the neighbourhood of Dar-es-Salaam rain was very deficient both in April and May.

Snowfall.

6. (*a*) In Persia the winter began unusually late in the second week of December, and lasted up to the end of April. The total precipitation of the period November to May was appreciably above normal owing mainly to heavy falls in March and April.

(*b*) In Baluchistan the precipitation was nearly normal in amount in November and April, in large excess in March, and in decided defect in December, January, February and May.

(*c*) On the ranges to the north of Kabul heavy falls occurred locally in December, March and the early part of April, and light to moderate falls in January and February. Heavy snow is also reported to have fallen around Herat in the first half of January and around Ghazni during the first week. About the middle of May the Paghman, Shakardara, Koh Sufed, Hindu Kush and Hazarajat ranges were still covered with snow.

(*d*) In the North-West Frontier Province the snowfall was lighter than usual in the Hazara hills throughout the winter except for heavy falls in December, March and early April; the last fall occurred down to a level of 3,000 feet. In north Waziristan the fall was apparently scanty, while in south Waziristan, although but little snow fell up to the end of February, the quantity received in March and the early part of April was well above normal. Much snow is said to have fallen on the Lowarai pass in the first week of April.

(*e*) The snowfall in the Kashmir hills was in marked excess in October and March, in moderate excess in December and April and much lighter than usual in November, January and February. In May no snowfall occurred and the previous accumulations were diminishing rapidly in depth. The Karakoram pass is reported to have opened exceptionally early.

(*f*) In the Punjab Himalayas abnormally heavy snow fell during the last week of October, but during the succeeding four months weather was much less disturbed than usual and snowfall on the whole was scanty. Frequent falls occurred in March and the early part of April, some of them down to unusually low levels: in Chamba the snowline is reported to have come down as low as 3,000 feet on the 23rd March. A rapid melting of the accumulations occurred in the latter part of April and during May with the result that the quantity lying at the present time is below the average.

(*g*) In the Almora hills the snowfall was nearly normal from October to January, in decided defect in February, in marked excess in March and slightly heavier than usual in the succeeding two months. The accumulations on May 21st were on the whole appreciably below normal.

(*h*) Snowfall was in slight excess in the western section of the North-East Frontier Tract and lighter than usual in the eastern and central sections as well as on the Himalayan ranges bordering on North Lakhimpur and the district of Kamrup.

On the whole it may be said that over nearly the whole area from Persia to Kumaon the snowfall was lighter than usual from November to February, and in decided excess in March and the early part of April. Little or no snow would appear to have fallen subsequently except in the Kumaon hills, and the accumulations at the present time are on the whole of about the average depth in the Afghan mountains, and in defect in the western Himalayas.

India.

7. In May the chief features have been—

(*a*) the early arrival and vigour of the monsoon, the rainfall of India as a whole being in excess by 84 per cent.

(*b*) the small amount of rainfall in northwest India and the accompanying high temperatures there.

(*c*) the lowness of pressure which has been below the average by ·07.

Upper Air.

8. Mr. Field has found that during the cooler half year in India the winds increase rapidly with height and frequently reach 100 miles an hour at a height of about 7 miles; in the hotter half year the increase is slight.

At Agra the diminution in velocity occurred at about the average time in 1914 and 1915, decidedly later than the average in 1916 and decidedly earlier

in 1917 and 1918. Also the direction of the upper current is from north-north-west, the average being from west-north-west.

INFERENCES FROM THE DATA.

9. An examination of past records shows that for the present purpose India may with advantage be divided into four parts. The rainfall of the extreme south of the Peninsula tends to vary in the direction opposite to that of India as a whole, and that of Lower Burma is largely independent of it. We may separate off Upper Burma, Assam, Bengal, Bihar and Chota Nagpur, as depending almost entirely on the Bay current. Then the rest of India will depend partly or entirely on the Arabian Sea current; it consists of the United Provinces, the Punjab, the North-West Frontier Province, Sind, Rajputana, Bombay, Central India, the Central Provinces, Hyderabad, Mysore, the north Madras coast and Orissa. This area, forming the greater part of the country may be called "India main" and is fairly homogeneous in its dependence on external meteorological factors.

10. Considering "India main" perhaps the chief factor affecting its rainfall is pressure in South America during April and May. This is favourable when high and this year is distinctly below normal. It tends to vary in the direction opposite to that of pressure at Mauritius, which is favourable when low in May, which it is to a slight extent this year. The rainfall at Zanzibar in April and May should be in defect in order to improve the outlook: and on the whole it has been in slight defect. The amount of snow lying on the hills north and north-west of India appears from the reports to be normal or slightly less than normal; and this conclusion is supported by the high temperatures in May along the north-west frontier as well as by the earliness of the rise of the Blue Nile, with which snowfall to the west of India has a close relationship. The effect of a deficiency of snow on the rainfall of India is favourable, especially in the north-west.

It seems natural to interpret the earliness of the recent change in the upper air movement as connected with the earliness of the setting in of the monsoon.

The unfavourable effect of the South America pressure on "India main" appears to be almost cancelled by the other factors and no large ill effect on the Arabian Sea current is likely.

11. The Bay current seems to be chiefly influenced by May rainfall at Seychelles and should therefore be stronger than usual.

SUMMARY.

(*a*) The monsoon rainfall of Upper Burma and north-east India is likely to be in excess.

(*b*) In the remainder of India, excluding Lower Burma and the south of the Peninsula, the outlook is roughly normal though slightly perhaps on the unfavourable side.

(*c*) The rainfall of north-west India is not likely to be affected prejudicially by accumulations of snow in the Himalayas.

COTTON PRESS RETURN.

No. 14 of 1917-18.

PREFATORY NOTE.

The Cotton Season, 1917-18.

The yield of the cotton crop of 1917-18 was estimated in February, 1918, at 4,035,000 bales on an area of 24,781,000 acres, as compared with 4,489,000 bales on an area of 21,745,000 acres, the revised final figures of the preceding year. There was a decrease of 10 per cent in outturn. There were 951,000 bales of cotton pressed in the pressing factories, and 329,000 bales of unpressed cotton received in the spinning mills, from 1st September, 1917, to 31st March, 1918, as against 1,413,000 bales and 306,000 bales, respectively, during the corresponding period of last year, showing a decrease of 33 per cent in the case of presses, but an increase of 8 per cent in the case of mills. Too much stress should not be laid on the accuracy of these returns as a means of checking the forecast estimates of outturn, as there is at present no system in vogue of furnishing complete returns from all presses and mills. The figures for the Native States of Hyderabad, Central India, Rajputana, and Mysore are, as will be seen from the footnotes to the tables, incomplete and have been excluded from this comparison.

AN ACT TO MAKE FURTHER PROVISION WITH RESPECT TO MILITARY SERVICE DURING THE PRESENT WAR.

[18th April 1918.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled and by the authority of the same, as follows :—

Extension of obligation to Military Service.

1. (*1*) Every male British subject who has, at any time since the fourteenth day of August nineteen hundred and fifteen, been, or who for the time being is, in Great Britain, and who at the date of the passing of this Act has attained the age of eighteen years and has not attained the age of fifty-one years, or who at any subsequent date attains the age of eighteen years, shall, unless he is for the time being within the exceptions set out in the First Schedule to this Act, be deemed, as from the date of the passing of this Act, or as from that subsequent date, or, if having been within those exceptions he subsequently ceases so to be, as from the date on which he so ceases, as the case may be, to have been duly enlisted in His Majesty's regular forces for general service with the colours or in the reserve for the period of the war, and to have been forthwith transferred to the reserve :

Provided that—

(*a*) if it appears to His Majesty at any time that it is necessary so to do for the defence of the realm, His Majesty may by Order in Council declare that the foregoing provision shall, as respects men generally, or as respects any class of men, have effect, as from a date to be specified in the Order, as if any age specified in the Order not exceeding fifty-six years were therein substituted for the age of fifty-one years, but where it is proposed to make any such Order as aforesaid, a draft of the Order shall be presented to each House of Parliament, and the draft Order shall not be submitted to His Majesty in Council unless each House presents an Address to His Majesty praying that the Order may be made ; and

(*b*) as respects any person being a duly qualified medical practitioner, the foregoing provision shall have effect as if the age of fifty-six years were therein substituted for the age of fifty-one years.

(2) The proviso to section two, and section eight, of the Military Service Act, 1916 (Session 2), shall cease to have effect : 6 & 7 Geo. 5, c. 104

Provided that the foregoing provision shall be without prejudice to any undertaking recognised by His Majesty's Government and for the time being in force, whereby it is provided that any released or exchanged prisoners of war shall not serve in His Majesty's Forces during the present war.

(3) All the provisions of the Military Service Acts, 1916 to 1918, as amended by this Act, shall, so far as applicable, extend to men to whom this section applies in the same manner as to men to whom section one of the Military Service Act, 1916 (Session 2), applied.

Power by Order in Council to apply Act to Ireland.

2. His Majesty may by Order in Council extend this Act to Ireland, and this Act if so extended shall, subject to such modifications and adaptations as may be made by the Order for the purpose of making it applicable to Ireland, have effect accordingly.

An Order in Council under this section may, as respects the civil court before which proceedings in respect of any offence punishable on summary conviction under the Reserve Forces Acts, 1882 to 1907, the Army Act, the Military Service Acts, 1916 to 1918, or this Act, or any orders or regulations made thereunder, are to be brought in Ireland—

(a) make special provision with respect to the constitution of the court ; and

(b) assign any such proceedings to such civil court or courts as may be specified in the Order.

Power by proclamation to withdraw certificates of exemption in case of national emergency.

3. (1) His Majesty may, by proclamation declaring that a national emergency has arisen, direct that any certificates of exemption, other than certificates expressed to be granted or renewed solely on the ground specified in paragraph (c) or on the ground specified in paragraph (d) of sub-section 1) of section two of the Military Service Act, 1916, granted or renewed to any class or body of men specified in the proclamation, or to men of any class or description so specified shall, as from the date specified in the proclamation, cease to have effect, and all certificates to which the proclamation applies shall as from that date cease to be in force. 5 & 6 Geo. 5, c. 104.

(2) While any such proclamation remains in operation no application shall, except in so far as the proclamation provides for the making of applications in any special cases, be entertained for the grant or renewal of any certificate to which the proclamation applies, or for the grant of any certificate to which the proclamation would have applied if the certificate had been in existence at the date when the proclamation came into operation, and if any application for the grant or renewal of any such certificate is pending at that date, it shall be deemed not to have been made.

Provisions as to applications for certificates of exemption and as to calling up.

4. (1) The Local Government Board or, as respects Scotland, the Secretary for Scotland may make regulations for any of the following purposes :—

(a) For providing for applications for or relating to certificates of exemption (including appeals) being made to such tribunals, constituted in such manner and for such areas, as may be authorised by the regulations, and for authorising tribunals to act by committees or panels constituted in such manner as may be provided by the regulations :

(b) For establishing special tribunals, committees, or panels for dealing with particular classes of cases :

(c) For regulating and limiting the making of such applications as aforesaid and the grant, renewal, variation, or withdrawal of certificates :

(d) For providing for any other matters for which it may be necessary to make provision in order to secure the expeditious making and disposal of such applications and for any other matter for which provision may be made under paragraph five of the Second Schedule to the Military Service Act, 1916.

Any regulations made under this sub-section shall have full effect notwithstanding anything in the provisions of the Military Service Acts, 1916 to 1918, and those provisions, so far as they are inconsistent with any regulations so made, shall be repealed :

Provided that nothing in this section shall authorise the making of regulations for altering the terms of paragraphs (a), (b), (c) or (d) of sub-section (1) of section two of the Military Service Act, 1916.

(2) If any person, with a view to preventing, hindering, or postponing—

(a) the calling up of himself or any other person for any form of military service or for any medical examination as to his fitness therefor ; or

(b) the operation of any notice duly given for the purpose of so calling up any person ;

or otherwise in connection with any proceedings before any tribunal or other body established for the purpose of dealing with applications for or relating to certificates of exemption, makes or connives at the making of any statement, whether oral or in writing, which is false or misleading in any material particular, he shall be liable on summary conviction to imprisonment for a term not exceeding six months with or without hard labour.

(3) If any question arises in any legal proceedings under the Reserve Forces Acts, 1882 to 1907, or any orders or regulations made thereunder whether any certificate of exemption has been withdrawn or has otherwise ceased to be in force, the court may require the holder of the certificate to give evidence on the question, and if satisfactory evidence is not given to the contrary the certificate shall be deemed to have been withdrawn or to have otherwise ceased to be in force.

(4) It shall be the duty of any man holding a certificate of exemption, if the certificate has been withdrawn or has ceased to be in force or if, in the case of a conditional certificate, the conditions on which the certificate was granted are no longer satisfied, forthwith to transmit the certificate to the local office of the Ministry of National Service for the area in which the man is registered under the National Registration Acts, 1915 and 1918, with a notification that the certificate has been withdrawn or ceased to be in force, or that the conditions are no longer satisfied, as the case may be; and if he fails without reasonable cause or excuse to do so he shall be liable on summary conviction to a fine not exceeding fifty pounds.

(5) A man who holds a certificate of exemption (other than a certificate of exemption from combatant service only), or in respect of whom an application has been duly made for the grant or renewal of a certificate of exemption, shall not be liable for service with the colours while the certificate is in force or until the application has been disposed of, as the case may be, but notices served for the purposes of the Reserve Forces Acts, 1882 to 1907, shall not be deemed to be invalid on the ground only that they were served before any such man became liable for service, and any such man may at any time be required to present himself for medical examination or re-examination.

(6) Every person to whom a certificate of exemption shall be granted by a tribunal after the thirtieth day of April, nineteen hundred and eighteen, shall, unless the tribunal by which the certificate is granted otherwise direct, be liable on being so required in such manner as may be prescribed by Order in Council to join the Volunteer Force and remain a member of that Force for the period during which the certificate remains in force, and shall, during that period attend such drills, undergo such training and undertake such military duties as may be so prescribed.

Amendment of 7 and 8 Geo. 5, c. 26.

5. The Military Service (Conventions with Allied States) Act, 1917, shall have effect as if for references to the Military Service Act, 1916, and to the Military Service Acts, 1916 and 1917, there were substituted references to the Military Service Acts, 1916 to 1918, and this Act, and, in the event of this Act being extended to Ireland, as if for the reference to Great Britain there were substituted a reference to the United Kingdom, and the Military Service (Conventions with Allied States) Act, 1917, shall apply accordingly, subject to the modifications aforesaid and to such other modifications as may be prescribed by Order in Council made under this Act.

Power to revoke or vary Orders in Council or proclamations.

6. Any Order in Council or proclamation made under this Act may be revoked or varied by any subsequent Order in Council or proclamation made in the like manner and subject to the like conditions.

Presentation of Orders in Council and proclamations to both Houses of Parliament.

7. Every Order in Council made under this Act, other than an Order in Council made in pursuance of section one thereof, and every proclamation so made, shall be laid before each House of Parliament forthwith, and if an Address is presented to His Majesty by either House of Parliament, within fourteen days after the Order or proclamation is laid before it, praying that the Order or proclamation may be annulled, His Majesty in Council may annul the Order or proclamation, and it shall thenceforth be void, but without prejudice to the validity of anything done thereunder.

Short title, interpretation, and repeal.

8. (1) This Act may be cited as the Military Service (No. 2) Act, 1918, and shall be construed as one with, and be included among, the Acts which may be cited as the Military Service Acts, 1916 to 1918.

(2) In this Act, unless the context otherwise requires, the expression "certificate of exemption" means any certificate of exemption from military service granted or renewed, whether before or after the passing of this Act, to any man belonging to the Army Reserve.

(3) The enactments specified in the Second Schedule to this Act are hereby repealed to the extent mentioned in the third column of that schedule :

Provided that, without prejudice to the general application of section thirty-eight of the Interpretation Act, 1889, with regard to the effect of repeals, the repeal of the said enactments shall not affect any obligation whatsoever incurred by any man to whom section one of the Military Service Act, 1916, or section one of the Military Service Act, 1916, (Session 2) applied.

IMPORT AND EXPORT REGULATIONS.

The 22nd June, 1918.

No. 5140.—The following list of restricted imports, issued by the War Trade Board of the United States of America, is published for general information:—

List of Restricted Imports No. 1.

(W. T. B. R. 52.)

23rd March 1918.

Under the power conferred upon him by the Trading with the Enemy Act, the President, on February 14th, 1918, issued a proclamation which required an Import license for all articles

from all countries. The chief purpose of this was to enable this Government to eliminate less essential imports to the end that tonnage might be conserved, and additional shipping be made available for the transportation of troops and supplies to Europe. Similar steps have been found necessary by the other allies, and England particularly has found it necessary to impose most drastic import restrictions in order to most effectively devote her shipping to the successful prosecution of the war.

For many weeks past, a corps of specialists have been giving the closest study as to the manner in which this import restriction would be exercised so that the greatest saving could be accomplished with the least injury to our ordinary commercial activities. The question was still further complicated by the earnest desire of this Government to affect as little as possible the Industry and Commerce of the countries associated with us in the war, and to work as little hardship as possible to neutrals. The question involves close co-operation with the Shipping Board and consultation with the State Department, the Treasury Department, the Food Administration, and other Branches of the Government, as well as the War Trade Board, within whose Province falls the actual administration of the control. As a result of these deliberations, the War Trade Board through its Bureau of Imports publishes the first list of Restricted Imports.

Applications for license to import the articles appearing on the list will not be granted except under the following circumstances :—

(1) When the articles mentioned are actually shipped from abroad prior to 15th April 1918.

(2) When coming by rail from Mexico or Canada when the goods in question originated in those countries or in others from which such goods are being licensed for import.

(3) When coming as a return cargo from European points and then only (*a*) when coming from a convenient port, (*b*) when loaded without delay and (*c*) when the importation from Europe is not specifically prohibited in said List.

In the future, therefore, applicants for licenses to import articles mentioned in the list will be obliged to show in their applications the existence of such of the facts above outlined as will warrant the granting of such licenses. In the case of shipments from European points, the most satisfactory evidence will be proof that shipping space has been actually engaged. The present form of application for Import license will generally be found adequate for this purpose, and where this is not found to be the case, a letter setting forth the additional facts should accompany such application.

The United States Consuls have been instructed not to issue consular invoices on and after 15th April 1918, for the articles mentioned in the list without first being furnished with the number of the Import license or being given other evidence of the issuance of such license. Shipping agencies are also advised not to accept for shipment consignments of the articles mentioned in the list without similar evidence of the issuance of the Import license. This applies only to the articles mentioned in the List. No proof of the issuance of the Import license for articles not so mentioned is to be required either by consuls before issuing consular invoices, or shipping agencies in accepting freight. It will devolve upon importers, therefore, to advise their shipper abroad by letter or cable, of the number of their Import license so that such shipper will be able to furnish the same to the consuls and the shipping agencies. This will mean that Importers must be diligent in applying for Import licenses a sufficient time in advance of the shipment so that the number of the Import license may be communicated abroad in ample time.

It should be borne in mind by importers that the publication of this List in no wise relieves them of the necessity of applying for license to import articles not on the list, as all commodities require an import license except such as are now permitted to be imported under general licenses.

The dates appended to various prohibitions are those of Orders of Council imposing or amending those prohibitions since the Royal Proclamation of 10th May, 1916. Where no date appears it may be assumed that the prohibition stands as it did on the 10th May, 1916.

List E (page—980).—Goods specially prohibited by Royal Proclamation of the 13th March, 1917, as amended by Orders of Council of the 10th August, 1917, and the 27th November, 1917, to be exported to Switzerland. The attention of exporters is drawn to the fact that various articles marked B or C may, in view of the percentage of copper contained in them, be subject to the Copper Prohibition (List A). (See "Copper.")

Application must therefore be made to the War Trade Department for licences to export goods which fall within the aforementioned copper prohibition on account of the quantity of copper contained therein. Such applications should always indicate clearly the actual quantity of copper and/or copper alloys the goods contain.

LIST F.

Goods of every description [other than (1) printed matter of all descriptions, and (2) personal effects accompanied by their owners], whether mentioned in the foregoing lists or not, are prohibited from export to Norway, Sweden, Denmark and Holland in accordance with the Royal Proclamation of 29th September 1917.

In this connection attention is drawn to the following reprint of a notice which appeared in the Public Press of the 4th October, 1917.

The Director of the War Trade Department calls attention to the Royal Proclamation of September 29th, 1917, prohibiting the export, as from October 8th, 1917, of all goods (with the following exceptions) to Sweden, Denmark, Norway and Holland :

1. Printed matter of all descriptions (which will remain subject to the censorship regulations).
2. Personal effects accompanied by their owner.

It is not proposed immediately to refuse all consideration of applications for the grant of licenses for the export of goods which have not hitherto been prohibited from export to Norway, Sweden, Denmark, and Holland, but which now become prohibited under the Royal Proclamation in question. Exporters are warned, however, that the continuance of this arrangement must not be counted upon. The special arrangements in regard to the export of goods to Sweden, notified in the announcement issued by the War Trade Department on August 18th, 1916, are withdrawn as from October 8th, 1917, Sweden being thus placed on the same footing as the other Scandinavian countries and Holland. This order also applies to articles consigned by parcels post.

The Arabian Sea monsoon current strengthened considerably on the west coast of the Peninsula, and some heavy falls of rain were recorded in Malabar and the Konkan, but owing to an area of low pressure off the coast rainfall failed to penetrate inland until the end of the week.

Northeast India, including Orissa.—Nearly general rain fell in Assam from the 15th to the 20th, in Bengal on every day of the week, and in Bihar and Orissa on the 13th, 14th, 15th and 16th.

COTTON PRESS RETURN.

No. 15 of 1917-18.

PREFATORY NOTE.

The Cotton Season, 1917-18.

The yield of the cotton crop of 1917-18 was estimated in February, 1918, at 4,035,000 bales on an area of 24,781,000 acres, as compared with 4,489,000 bales on an area of 21,745,000 acres, the revised final figures of the preceding year. There was a decrease of 10 per cent in outturn. There were 1,005,000 bales of cotton pressed in the pressing factories, and 347,000 bales of unpressed cotton received in the spinning mills, from 1st September, 1917, to 15th April, 1918, as against 1,509,000 bales and 325,000 bales, respectively, during the corresponding period of last year, showing a decrease of 33 per cent in the case of presses, but an increase of 7 per cent in the case of mills. Too much stress should not be laid on the accuracy of these returns as a means of checking the forecast estimates of outturn, as there is at present no system in vogue of furnishing complete returns from all presses and mills. The figures for the Native States of Hyderabad, Central India, Rajputana, and Mysore are, as will be seen from the footnotes to the tables, incomplete and have been excluded from this comparison.

Under exports, Bengal showed an increase of 56 per cent, Burma of 44 per cent, Sind of 13 per cent, and Madras of 23 per cent, while Bombay alone showed a decrease of 32 per cent. These comparisons are with the preceding month (April, 1918).

In the two months ended May, 1918, the excess of exports over imports of private merchandise was ₹12,97 lakhs, as against ₹16,28 lakhs in the corresponding period of 1917 and ₹14,11 lakhs in 1914. As the publication of treasure figures has been temporarily discontinued, it is not possible to give here the net (private) exports from April to May, nor the net balance of trade in the same period. It may be of interest to note that the net (private) exports are below those of 1917, but higher than those of 1916. The balance of trade, so far as shown by the statistics of merchandise, treasure, Council Bills, and enfaced Rupee paper, in the two months ending May, 1918, was in favour of India, but not to so large an extent as in the corresponding period of 1917 and 1916.

(a) Approximate rate for Telegraphic Transfers.

The amount of Council Bills and Telegraphic Transfers paid in India in the two months ended May, 1918, was over R10,33 lakhs, of which over R9,32 lakhs were paid through the Paper Currency Reserve and over R1,01 lakhs through the Treasuries. In the two months ended May, 1917, the amount was about R9,87 lakhs, of which about R97 lakhs were paid through the Gold Standard Reserve, R8,73 lakhs through the Paper Currency Reserve, and R17 lakhs through the Treasuries. In the two months ended May, 1916, the amount of Council Bills paid was R4,39 lakhs. As regards enfaced Rupee Paper, R2,500 represented the amount of paper enfaced to London and over R3 lakhs the amount re-transferred from London, in the two months April and May, 1918, while in the corresponding period of 1917, R45,200 represented the amount of paper enfaced to London and R35 lakhs the amount re-transferred from London.

The customs duty figures are an index to the volume of the import trade only, since under exports jute, rice, and tea only are subject to duty. In the two months ended May, 1918, the import duties increased to nearly R1,77 lakhs from nearly R1,63 lakhs in the two months ended May, 1917, and the export duties rose to over R55 lakhs from R33 lakhs. The grand total of gross Indian sea and land customs revenue (excluding salt revenue) in the two months, April and May, 1918, amounted to over R2,71 lakhs, as compared with nearly R2,11 lakhs in the same period of last year.

Railway Statistics.

Railway statistics, like the import and export statistics above, are a valuable index to the general movement of trade throughout the country, and show that the earnings from 1st April to 1st June, 1918, were R14,15 lakhs, as against R13,33 lakhs in the corresponding period of 1917, or an increase of R82 lakhs.

Trade of Aden during April, 1918.

The grand total value of the imports and exports of merchandise, by sea, into and from the port of Aden amounted to over R1,63 lakhs in the month of April, 1918. The value of the principal articles of imports and exports during April, 1918, was as follows:—

RETURN, with a prefatory note, showing (1) the VALUE of the TOTAL IMPORTS by sea of private MERCHANDISE into BRITISH INDIA from the PRINCIPAL COUNTRIES, and (2) the VALUE of the TOTAL EXPORTS by sea of INDIAN MERCHANDISE from BRITISH INDIA to the PRINCIPAL COUNTRIES, for each of the calendar years 1915, 1916, and 1917.

PREFATORY NOTE.

The returns of Indian imports and exports including re-exports of merchandise (exclusive of treasure and Government stores) by sea during the calendar year 1917 show a trade balance (excluding treasure) in favour of India of nearly £56 millions or one per cent below that of the corresponding period of the previous year. In the calendar year 1916 the balance in favour of India was nearly £57 millions.

India's Balance of Trade in the calendar years 1915, 1916, and 1917 was as follows :—

	Calendar year.

Balance of Trade in favour of India†	—	—	—

As the publication of the treasure figures has been temporarily discontinued, it is not possible to give here the net (private) exports during the calendar year, nor the net balance of trade in the same period. It may be of interest to note that the net (private) exports, including treasure, are considerably below those of 1916, but slightly above those of 1915. The balance of trade, so far as shown by the statistics of merchandise, treasure, Council Bills, and Enfaced Rupee paper, in the calendar year 1917 is in favour of India, though not to so large an extent as in 1915 and 1916.

The total exports of Indian Merchandise in the calendar year 1917 amounted to over £149 millions, of which £80 millions went to ports within the British Empire, and £69 millions to ports outside the Empire. The United Kingdom took 27·8 per cent of the exports, followed by Japan 13·1 per cent, the United States 12·7 per cent, and France 4·6 per cent. Italy took 3·6 per cent and Egypt 9·6 per cent, but a considerable portion of the shipments to Egypt was transit trade, the exports being consigned to Port Said for orders. During the calendar year 1917 there were imported into India goods of the value of nearly £99 millions. Of this amount £65 millions were sent from ports within the Empire, £56 millions alone coming from British ports. The principal exporter to India, apart from the United Kingdom, was Japan, which exported goods to the value of over £10 millions. The United States were the third largest exporter, and Java the fourth.

The following figures showing India's trade with the British Empire and Allies and the Neutral countries during the calendar years 1915, 1916, and 1917 are interesting :—

Short title, local extent, and commencement.

1. This Law may be called the Abu Revenue Law, 1918;

It extends to the District of Abu as defined by the notification of the Government of India in the Foreign and Political Department, No. 2221-I. B., dated the 1st October 1917; and

(*b*) "Revenue Officer" includes—

(1) the Collector; and

(2) any person whom the Agent to the Governor General in Rajputana may, from time to time, appoint by name or by office to do anything required by this law, to be done by a Revenue Officer;

(*c*) "land-revenue" includes all dues imposed on the land in the District of Abu previous to this law; and includes taxes on cattle;

(*d*) "malguzar" means a person liable individually or jointly for the payment of land-revenue.

Rules as to instalments and times and places of payment.

3. The Agent to the Governor General may, from time to time, make rules for the assessment of the land-revenue, and as to the instalments by which and the places and times at which the land-revenue in respect of any estate shall be paid, and as to the mode in which notice of such assessment, instalments, places and times shall be given to the persons concerned.

Until the Agent to the Governor General otherwise directs, the practice in respect of such matters prevailing at the time this law comes into operation shall continue.

"Arrear," "Defaulter".

4. Any sum not paid as required by section 3 or the rules framed thereunder shall be deemed to be an arrear of land-revenue, and every person liable for it shall be deemed to be a defaulter.

Issue of warrant of arrest.

5. When an arrear of land-revenue has accrued, the Collector may issue a warrant ordering any defaulter to pay the whole or any part of such arrear within a time therein specified, and may empower an officer named in such warrant, in the event of the amount demanded not being so paid, to arrest such defaulter and bring him to the tahsil.

Order to bring defaulter to district headquarters.

6. If, when the time named in such warrant has expired, the defaulter is brought to the tahsil, and does not either pay such amount or the portion thereof remaining unpaid (as the case may be), or show good reason for extending the time for payment thereof, the Collector may direct him to be conveyed to the Collector's headquarters, and there kept under personal restraint for ten days or until he pays such amount or such portion thereof within that period.

Delegation to subordinate Revenue officer of powers under sections 5 and 6.

7. The Collector may empower any Revenue officer subordinate to him, and not being of lower grade than that of Tahsildar, to exercise the powers conferred on the Collector by sections 5 and 6.

8. If the amount named in any warrant issued under section 5 or the portion thereof remaining unpaid (as the case may be) is not paid within the period of ten days fixed by section 6, and no good reason for the delay in the payment thereof is shown, the Collector may, by his warrant, commit the defaulter to the civil jail, to be there detained for such period not exceeding six months, or, if such amount or such portion thereof is more than five hundred rupees, for such period not exceeding one year, from the date of such warrant, as such Collector thinks fit, unless such amount or such portion thereof is sooner paid.

Commitment to civil jail.

9. Whenever any of the processes provided in section 12 is taken in respect of an arrear of land-revenue, any defaulter whose holding has been attached, shall, if he is in custody under section 5, 6 or 8, be forthwith discharged.

Discharge of defaulter on enforcement of process under section 12.

10. Instead of, or in addition to, the proceedings authorised by sections 5 to 8 inclusive, the Collector may, in order to realize the whole or any portion of an arrear of land-revenue, order the attachment and sale of the moveable property of any defaulter with the exception of the following, that is to say—

Procedure to be followed.

12. When an arrear of land-revenue has accrued in respect of any land, the Collector may, in addition to, or instead of, the processes hereinbefore specified, cause such land or any part thereof to be attached and taken under the direct management of any agent whom he appoints in that behalf.

Power to attach land.

13. During the continuance of an attachment under section 12 the defaulters shall be excluded from possession of the land attached, and the agent appointed by the Collector shall stand for all purposes in their position, being bound by all their liabilities to any subordinate proprietors, incumbrancers or tenants of, or on, such land, and being entitled to manage such land, and to receive all rents and profits accruing due to such defaulters therefrom.

Effect of attachment.

14. The surplus profits of such land, after defraying the cost of attachment and management, shall be applied, first, to the payment of any land-revenue falling due upon such land during the attachment, and next, to discharging the arrear of land-revenue.

Profits of land how applied.

15. The attachment shall continue until the arrear of land-revenue is paid or realized from the profits of the land, or the Collector thinks fit to reinstate the defaulters in possession.

Attachment when to cease.

16. When an arrear of land-revenue cannot be recovered by any of the processes hereinbefore described, the Collector may, with the previous sanction of the Agent to the Governor General, order the attachment under sections 12 to 15, inclusive, of any immoveable property of the defaulters other than that in respect of which such arrear has accrued, and may apply the provisions of those sections to such property until such arrear is discharged.

But no proceedings shall be instituted or maintained by a headman for the recovery of any sum so chargeable to a holding in an estate or village after the Collector has informed such headman that the Government demand on such estate or village has been remitted to an amount equal to such sum, and that such remission has been granted with special reference to such holding.

Additional powers which may be conferred on Revenue Officers.

19. The Agent to the Governor General may, subject to any restrictions imposed by the Governor General in Council, invest any Revenue officer by name or by office for any of the purposes of this law with any of the following powers, to be exercised by him in any part of the district of Abu and in any specified class of cases :—

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 22nd June 1918.

Burma.—The rainfall during the week was general throughout the Province. The fall was good in Lower Burma but light in the dry zone districts. Ploughing for the main rice crop is becoming general in Lower Burma and in the irrigated tracts of Upper Burma. Sowing in the nurseries continues. Cultivation for sesamum, cotton and groundnut is proceeding normally. Standing crops are generally in good condition. Cattle are generally healthy. The price of unhusked rice has risen slightly but is below normal. The market for white rice is steady at Rs. 230 for specials.

Assam.—The weather during the week was rainy and favourable. Floods caused some damage to crops in the Surma Valley and Kamrup. Manufacture of tea, sowing of winter rice seedlings and ploughing for transplanted winter rice continue. Cattle disease is reported in eight districts. The price of common rice shows a tendency to rise.

Bengal.—Heavy rain fell during the week over the greater part of the Province. It has hampered agricultural operations and has affected growth of crops on low lands. Some damage was also caused in certain parts of Eastern Bengal by a sudden rise of rivers. Ploughing of fields and transplanting of paddy seedlings are going on. The average price of common rice remained almost stationary with a slight tendency to rise.

Bihar and Orissa.—The rainfall during the week was general over the Province, the fall being mostly light to moderate. Sowing of winter rice and autumn crops is in progress. Standing crops are doing well. The price of common rice has risen in six districts, fallen in one and remained stationary in the remaining districts as compared with that of the preceding week. Cattle disease is reported from thirteen districts. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—The rainfall during the week was general throughout the Provinces. Preparation of land for and sowing of autumn crops, cotton and paddy, reaping of extra crops in places and irrigation of extra crops and sugarcane continue. Irrigation of autumn crops has commenced in places. Standing crops are doing well and prospects are favourable. The condition of agricultural stock is generally good. Fodder, water and market supplies are adequate. Prices have risen in a few places but elsewhere they are generally stationary.

The weekly report on scarcity in Garhwal is as follows:—The rainfall during the week was 1 inch 10 cents in Pauri, 3 inches 75 cents in Srinagar and 1 inch 98 cents in Karnaprayag. Standing crops are in good condition. Weeding continues. Prospects are good. Cattle disease is prevalent in some *pattis*. Fodder and water are sufficient. Prices are almost stationary. The market rates at Pauri are, wheat 6 and barley 8 seers per rupee and at Chamoli proper wheat 4½ and barley 6 seers per rupee. Prices vary greatly in the Chamoli sub-division. Advances for grain tickets and for the importation of grain continue. Grain is being imported in upper Garhwal by persons who have taken advances. The number of persons on gratuitous relief was 402. The public health is generally good.

Punjab.—During the week light showers were received in parts of the south eastern and submontane tracts and proved useful. Rain is now needed for the sowing of autumn crops. Sowings of cotton and other autumn crops continue and are below normal to normal. Standing extra spring crops, sugarcane and cotton are in average to good condition. The yield of extra spring crops is expected to be average. Cattle are healthy and fodder and water are sufficient. Prices are stationary but have an upward tendency. They range generally between normal and warning rates except in some western districts where they are between warning and scarcity rates. Price of wheat:—Ambala and Lahore 9½, Rawalpindi 7½, and Ferozepore and Lyallpur 10 seers per rupee.

North-West Frontier Province.—During the week rain fell throughout the Province, benefiting standing crops. Sowings of autumn crops are in progress in places. Threshing of wheat continues in one district with outturn average. Harvesting of extra spring crops is proceeding and the yield is expected to be average. Wheat is selling in Peshawar at 9½ and in Dera Ismail Khan at 10½ seers per rupee.

Sind.—During the week rain fell in some parts. Prices are stationary. Sowing is in progress.

Kashmir.—The week was generally dry. Standing crops of paddy in the valley are fair. Spring crops are being harvested in Muzaffarabad with outturn fair. Sowings for autumn crops are in progress. Cattle are generally healthy. Prices are normal in the valley and high in Muzaffarabad.

Rajputana.—The weather was hot but slight rain was received during the week. Land is being prepared for autumn crops. Cattle are in fair condition. Fodder and water are sufficient. Prices are steady.

Central India.—The rainfall during the week was partial and insufficient in Gwalior, Bhopal and Bundelkhand. Land is being prepared for autumn crops and sowing has commenced in places. Agricultural stock is generally in good condition. Scarcity of fodder prevails in ten parganas and of water in one pargana in Gwalior. Prices are high.

Central Provinces.—The weather during the week has been cloudy and warm. Light to heavy rain was received all over the Provinces, the largest quantity being 9¼ inches in Balaghat. Preparation of land for and sowings of autumn crops are in progress but the operations have been retarded in parts of the Bhandara, Balaghat, Raipur and Bilaspur districts owing to heavy rain. Fodder is scarce or dear at some places in Saugor, Narsinghpur, Chhindwara, Hoshangabad and Betul and cattle have consequently deteriorated in portions of the last two districts. The price of rice has fallen in Betul by 2 seers per rupee. Other variations are unimportant but the price of wheat and gram continues to rise slightly.

Feudatory States:—Moderate to heavy rain fell in all States. Sowings of autumn crops continue.

Bombay.—Slight rain fell during the week in the Presidency Proper. More rain is needed. Lands are being prepared for the cultivation of autumn crops. Sowing has generally commenced except in Gujarat. Agricultural stock is sufficient. Prices of food grains are generally steady.

Hyderabad.—The average rainfall duing the week was 59 cents. Sowings have been delayed owing to deficient rain. Sowing for autumn crops is general. Cattle are healthy. Prices of grains are alarmingly high. Wheat, coarse rice and *jwar* in districts are selling at 4, 4½ and 5½ seers respectively per *Osman siccа* rupee. *Jwar* is selling at 3½ seers per rupee in Nander.

Mysore.—The week was slightly wet. Standing crops are in good condition. Harvesting of sugarcane and paddy is proceeding with outturn fair. Cattle are generally healthy. Prices are generally stationary.

Coorg.—The week was generally rainy. Ploughing and sowing of seed for rice continue. Cattle are generally healthy. Water and fodder are sufficient. The public health is fair. Prices of food grains are high.

Madras.—The week was rainy on the west coast and on the hills and showery elsewhere. Standing crops are in fair to good condition generally. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally. Sowings of paddy and dry crops are proceeding normally. The condition of cattle is generally good. Prices are fairly steady.

APPLICATION FOR AMENDMENT UNDER SECTION 17.

Notice is hereby given that all persons interested in opposing the following application to amend may at any time within three months of the date of this *Gazette of India* give notice at the Patent Office in the prescribed form No. 5 of such opposition.

3036 of 1917. E. Roirant, of 100, Boulevard Victor-Hugo, Saint Ouen, Seine, France, seeks leave to amend the specification and drawings of his application for a patent numbered as above. The proposed amendments as shown in the printed specification are as follows :—

On page 5, by substituting the following paragraphs for lines 18 to 37 :—

"As soon as the pressure plunger has thus formed a hollow parison, the said plunger is withdrawn upwardly and the parison mould 21 moved downwardly, the neck mould 19 remaining stationary, thus compelling the glass to pass through the orifice of the parison mould 21, and drawing out a parison in the manner shown in Figure 7, without exposing the glass to the chill of two large and contiguous metal surfaces as is done according to the usual method.

"For some articles, it is desirable to have the pressure plunger 10 accompany the extension of the cavity in the parison, one such case of this kind being illustrated in Figures 8, 9 and 10 where it will be seen that the shape of the parison mould is somewhat different from that shown in Figures 5, 6 and 7; the shapes of the pressure plungers are also somewhat different.

"In carrying out the process, the cavity in the parison mould is almost filled with molten glass, as shown in Figure 8, after which the pressure plunger 10 is driven into the glass, forcing it up into the neck mould and forming a hollow parison, as shown in Figure 9. As soon as the parison is formed, the pressure plunger 10 is removed and another pressure plunger 10*a* inserted, wher upon the latter pressure plunger and the parison mould travel downward simultaneously with respect to the neck mould, thus mechanically drawing out the glass, as shown in Figure 10. The pressure plunger 10*a* is then removed and the parison delivered to the finishing mould.

"Figures 11, 12 and 13 illustrate the process in connection with a parison mould the cavity of which is, at no point, of a diameter greater than that where it joins the neck mould. The glass is poured into the parison mould 21 until it almost fills it completely and the shape of the pressure plunger 10 is such that a relatively slight penetration thereof into the parison mould suffices to fill the neck mould 19. The mechanical drawing out to length of the parison is accomplished by the simultaneous descent, the neck mould 19 remaining stationary of the pressure plunger 10*a* and the parison mould 21, as shown in Figure 13. In this case, it is preferred to use in the third or drawing out step of the process, a pressure plunger 10*a* having an elongated taper relative to the first plunger 10, which latter is withdrawn from the parison as soon as it is formed and the second plunger substituted therefor."

Figures 9, 10 and 14 of the drawings have also been amended.

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915", the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

Director of Statistics

Published by order of the Governor-General in Council

DEPARTMENT OF STATISTICS, INDIA.

TRADE FLUCTUATIONS IN SELECTED ARTICLES IN MARCH, 1918.

The object of the tables appended is to show the quantities of the principal staples of agricultural produce imported from the various provinces, etc., and from foreign countries into the ports of Calcutta, Bombay, Karachi, and into the Madras ports during the month of March, 1918, and for the twelve months, April 1917 to March, 1918, as compared with the corresponding periods of 1916-17. The statistics include foreign sea-borne and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, the Commissioners for the Port of Calcutta, etc.

TRADE FLUCTUATIONS IN MARCH, 1917 AND 1918.

It will be seen from table I, that the imports by rail, river, and sea in March, 1918, as against the corresponding month of 1917, show (in round numbers) a decrease of—

67 per cent in linseed
(6,000 tons as against 21,200 tons last year),

48 per cent in raw cotton
(2,29,600 bales as against 4,39,200 bales last year),

31 per cent in wheat (excluding wheat flour)
(70,200 tons as against 102,200 tons last year), and

15 per cent in rape and mustard seed
(10,200 tons as against 12,000 tons last year).

The imports of jute by rail, river, and sea into Calcutta show an increase of 62 per cent (411,700 bales as against 253,700 bales last year), due to larger exports from Assam and Bengal. The increase of 47 per cent (88,400 tons as against 60,200 tons last year) in the imports of gram and pulse into ports is accounted for by larger exports mainly from the Punjab and the United Provinces. The imports of rice (including paddy) show an increase of 3 per cent (111,900 tons as against 108,400 tons last year), owing to larger exports from Bengal.

It will be seen from table IV (wheat, excluding wheat flour) that the principal sources of the imports in March, 1917, were the United Provinces, Punjab and the Central Provinces and Berar, During March, 1918, the Provinces from which the ports received their supplies were mainly the United Provinces (58 per cent of the total), the Central Provinces and Berar (18 per cent) and the Punjab (14 per cent).

NOTE.—One bale of cotton or jute is equivalent to 400 lbs.
One maund is equivalent to 82⅔ lbs.
One maund of paddy is taken as equivalent to 25 seers of rice.

GENERAL RESULTS—TWELVE MONTHS' IMPORTS INTO THE PORTS FROM UP COUNTRY, ETC., THIS YEAR AND LAST YEAR.

The twelve months' figures in table I show (in round numbers) an increase of—

78 per cent in gram and pulse
(881,200 tons as against 496,300 tons last year),

49 per cent in wheat (excluding wheat flour)
(1,867,200 tons as against 1,254,600 tons last year),

26 per cent in tea
(316,574,000 lbs. as against 251,378,000 lbs. last year, and

1 per cent in raw cotton
(3,176,400 bales as against 3,146,200 bales last year).

The Imports of linseed by rail, river, and sea into ports show a decrease of 56 per cent (155,100 tons as against 356,200 tons last year), mainly on account of smaller exports from Bihar and Orissa, the United Provinces, the Central Provinces and Berar, Rajputana and Central India, and the Nizam's Territory. The decrease of 28 per cent (126,100 tons as against 174,300 tons last year) in rape and mustard seed is mainly accounted for by smaller exports from Bihar and Orissa and the United Provinces. The imports of jute into Calcutta show a decrease of 14 per cent (4,470,700 bales as against 5,199,800 bales last year) owing mainly to smaller exports from Bengal and Bihar and Orissa. The fall of 2 per cent (1,099,200 tons as against 1,123,000 tons last year) in the imports of rice (including paddy) is mainly due to smaller exports from Burma.

TRADE FLUCTUATIONS IN MARCH, 1918, AS COMPARED WITH THE PREVIOUS MONTH.

As compared with February, 1918, the imports in March, 1918, into the ports referred to above show (in round numbers) an increase of—

29 per cent in gram and pulse
(88,400 tons as against 68,300 tons previous month),

28 per cent in jute
(411,700 bales as against 321,800 bales previous month),

21 per cent in rape and mustard seed
(10,200 tons as against 8,400 tons previous month), and

5 per cent in rice (including paddy)
(112,000 tons as against 106,200 tons previous month),

and a decrease of—

26 per cent in tea
(16,189,700 lbs. as against 21,953,000 lbs. previous month), and

18 per cent in raw cotton
(229,000 bales as against 281,000 bales previous month).

The statistics for March, 1917 and 1918, as also for the twelve months ending March, 1917 and 1918, together with those for February, 1918 and March, 1918, are summarised below :—
